

NEELANSHU KARN

Data Analyst | B.Tech CSE & AI | Rishihood University
+91-7007191498 | neelanshu.2024@nst.rishihood.edu.in | github.com/karn-cyber

PROFESSIONAL SUMMARY

Data Analytics student skilled in Excel, Tableau, Python, and SQL with hands-on experience building dashboards and extracting actionable insights from complex datasets. Multi-award winner in data analysis competitions with strong leadership across university clubs and events.

TECHNICAL SKILLS

Languages: Python, SQL | **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
Visualization: Tableau, Microsoft Excel (Advanced), Power BI | **Tools:** Google Sheets, Jupyter Notebook, Git/GitHub
Concepts: EDA, Data Cleaning, Dashboard Design, Statistical Analysis, KPI Design, Agile / Scrum

PROJECTS

Short-Form Video & Attention Span Analytics Tools: Microsoft Excel, Python
github.com/karn-cyber/Section-A_G-2_Short_Form_Attention_Analytics

- Analyzed behavioral data of ~8,900 users across TikTok, Instagram Reels, and YouTube Shorts to study the impact of short-form video consumption on attention span and cognitive productivity.
- Designed and computed a custom North Star Metric — Cognitive Productivity Index (CPI) — combining daily screen time, self-reported focus scores, and content engagement metrics to produce a unified productivity score.
- Performed end-to-end EDA using Python (Pandas, Matplotlib, Seaborn) and built advanced Excel dashboards with pivot tables, conditional formatting, dynamic charts, and slicers for multi-platform comparison.
- Identified correlations between daily screen time (>3 hrs) and a 22% decline in self-reported focus, enabling targeted recommendations for healthier digital consumption habits.
- Delivered a structured multi-tab Excel report covering platform-wise trends, demographic breakdowns (age, gender), and actionable insights backed by statistical analysis.

Netflix-Style User Behavior & Engagement Analysis Tools: Tableau
github.com/karn-cyber/Section_A_G-1_Netflix-Style-User-Behavior-Dataset-

- Conducted a comprehensive analysis of streaming user behavior data to uncover viewing patterns, genre preferences, subscription trends, and churn risk indicators across diverse demographics.
- Engineered an interactive Tableau dashboard suite with 5+ visualizations including heatmaps, bar/line charts, and geographic maps, enabling dynamic drill-down by region, age group, and content category.
- Identified key engagement drivers — binge-watching frequency, peak usage hours, and genre affinity — leading to data-backed recommendations for personalized content strategy and user retention.
- Applied calculated fields and LOD expressions in Tableau to model user lifetime value and segment audiences by risk of churn, simulating real-world product analytics workflows.
- Presented findings in a DVA portfolio (github.com/karn-cyber/DVA_Portfolio) demonstrating end-to-end analytics lifecycle from raw data to executive-ready visual storytelling.

EDUCATION

B.Tech in Computer Science & Artificial Intelligence CGPA: 8.3 / 10.0
Newton School of Technology, Rishihood University | 2024 – 2028 (4th Semester)

Class XII – ISC Board 87.75%
IPEM International School and College

Class X – ICSE Board 97.6%
IPEM International School and College

ACHIEVEMENTS & COMPETITIONS

- 1st Position – Productathon (Product Strategy & Development Competition), Rishihood University
- 2nd Position – Data Heist (Data Analysis & Visualization Competition), Rishihood University
- 3rd Position – Data Desk (Data Analysis Competition), Rishihood University
- 3rd Position – Designathon + Most Innovative UI Award, Rishihood University

LEADERSHIP & EXTRACURRICULARS

President – Society for Aerospace & Space Technology (SAST) Sept 2024 – Present
Product Lead – DevX Arthakram Consulting Club | **Sponsorship Head** – Quantica Fest (raised ₹6L+) | **Clan Leader**
| **Lead** – TECH General Championships, Rishihood University
